BEFORE AND AFTER YOUR WAX.

Simple care for smoother skin and calmer results between visits.

BEFORE

- Don’t shave. Hair should be about 0.5 to 1cm, roughly a grain of rice.
- Keep the area clean. No lotion, oil, deodorant or makeup.
- Exfoliate gently 24 hours before. It lifts dead skin and helps hair release.
- Avoid caffeine and alcohol. They can make skin more sensitive.
- Wear loose clothing to your appointment, for comfort afterwards.
- If you’re nervous, a mild pain reliever 30 minutes before is an option. Check with your doctor if unsure.

AFTER

For 24 hours, skip sex, the gym, swimming, and hot showers or saunas. It lowers irritation and infection risk.

Soothe the skin with aloe gel or a post-wax product.

Exfoliate two to three times a week, from 48 hours after. It helps prevent ingrowns.

Moisturise daily. Soft skin helps hair grow through more easily.

Avoid sun and sunbeds for at least 48 hours.

Don’t tweeze or shave between visits. Stick to your wax cycle for the best results.
